SEX EDUCATION POLICY

SEX EDUCATION POLICY

Due to the ages and stages of development of our children, Governors and staff at the Growing Together Federation do not feel that a formal sex education programme is appropriate.

We are however aware, that children may ask questions and our policy would be to answer factually but in an understandable age appropriate way. Some basic concepts will be introduced to the children such as gender, relationships, love, families and communities through our educational programmes.

Children will always be encouraged to be respectful and caring of each other and to have a respect for diverse relationships.
